## QUALITY MEASURE

## MEASURE SOURCE

## SAMPLE DATA FIELDS

## CALCULATION

Reduce time between screening mammogram and diagnostic mammogram

**NQNBC™ Program**  
<https://www.nqmbc.org/quality-measure-program/quality-measures.cms>

- \* Unique patient identifier
- \* Patient race/ethnicity
- \* Date of screening mammogram
- \* Screening mammogram results abnormal (Y/N)
- \* Date of diagnostic mammogram
- \* Type of diagnostic mammogram
- \* Screening mammogram CPT codes "77055", "77056", "77057", "77067", "G0202"
- \* Diagnostic mammogram CPT codes "G0204", "G0206", "77065", "77066"

Average days between date of screening mammogram and diagnostic mammogram

Reduce time between first positive biopsy and any initiation of cancer-related treatment

**Cleveland Clinic**  
<https://pubmed.ncbi.nlm.nih.gov/34105030/>  
  
\*benchmark target of 28 days

- \* Unique patient identifier
- \* Patient race/ethnicity
- \* Date of biopsy
- \* Date of treatment initiation
  - ☆ Count first date of surgery, chemotherapy, radiation therapy, and hormonal therapy

Average days between first positive biopsy and any initiation of cancer-related treatment
